Draw Ones, Tens, and Hundreds

Grade 2 • Module 1 • Topic E • Lessons 21–22

I can draw ones, tens, and hundreds to make groups of tens, hundreds, and 1 thousand.

1. Our units

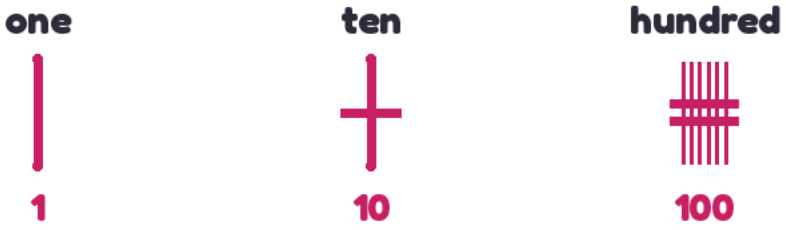

A straw is 1 one. We bundle 10 ones to make 1 ten. We bundle 10 tens to make 1 hundred. And 10 hundreds make 1 thousand.

1 one | **1 ten** = 10 ones | **1 hundred** = 10 tens

2. Quick drawings

Drawing straws takes a long time, so we draw units the quick way: a line for a one, a line with a line across it for a ten, and a bundle for a hundred.

326 = 3 hundreds, 2 tens, 6 ones

3. How to draw units to count

We count up from the first number to the last number. We say each number as we draw it.

1. Draw the first number.
2. Draw ones to get to the next ten.
3. Draw tens to get to the next hundred.
4. Draw hundreds. Stop before you go past the last number.
5. Draw tens (or ones) to finish.

Example from the book: 326 to 750

First, I draw 326.
Next, I draw 4 ones to get to 330.
Then, I draw 7 tens to get to 400.
Then, I draw 3 hundreds to get to 700.
Last, I draw 5 tens to get to 750.

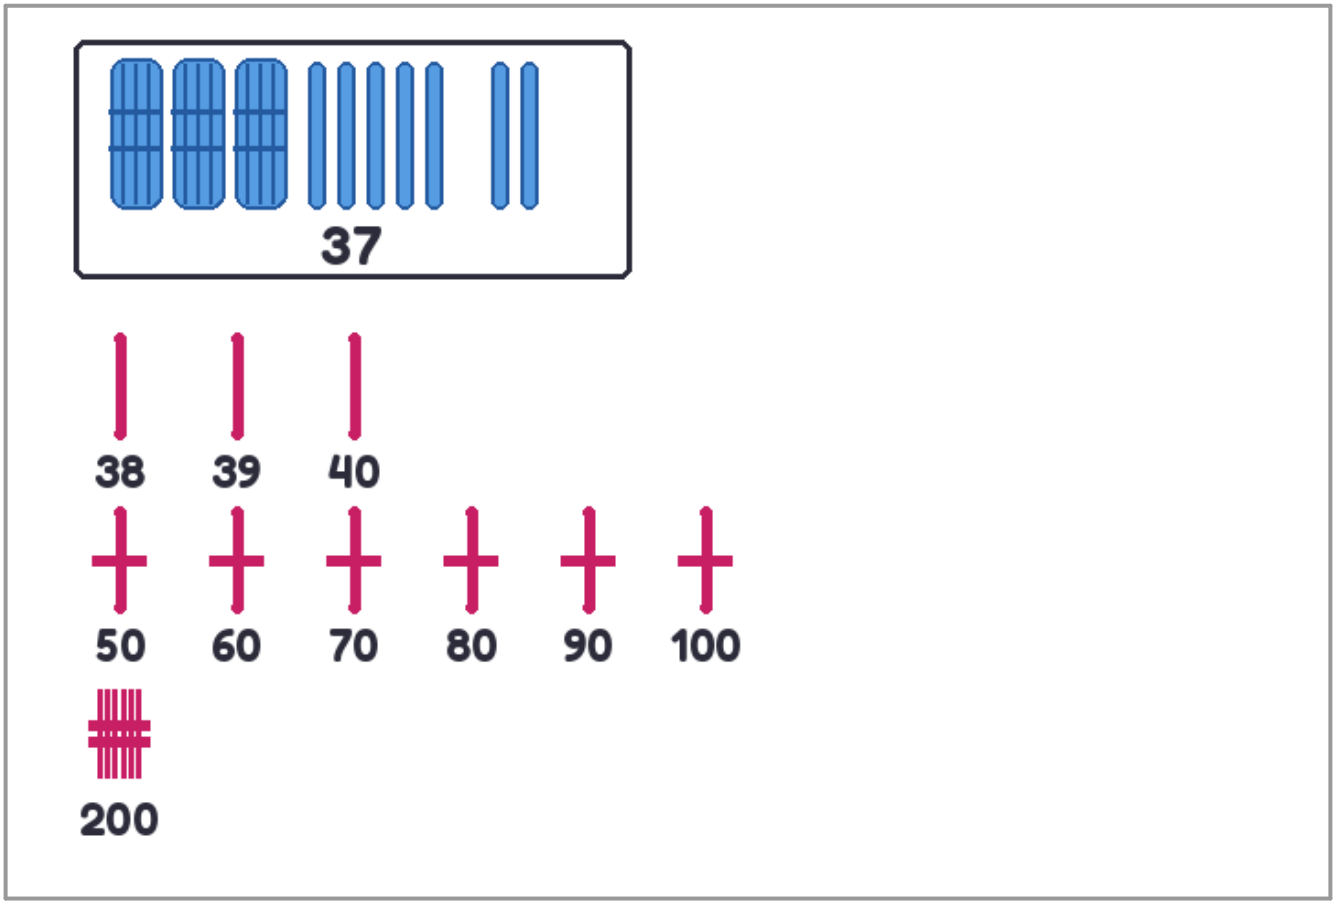

We say: 326, 327, 328, 329, 330, 340, 350, 360, 370, 380, 390, 400, 500, 600, 700, 710, 720, 730, 740, 750

Tip

The next ten after 37 is 40. The next hundred after 120 is 200. Numbers that end in 0 or 00 are easy to jump from!

Practice Partner, Problem 1

Draw units to count from 37 to 200.

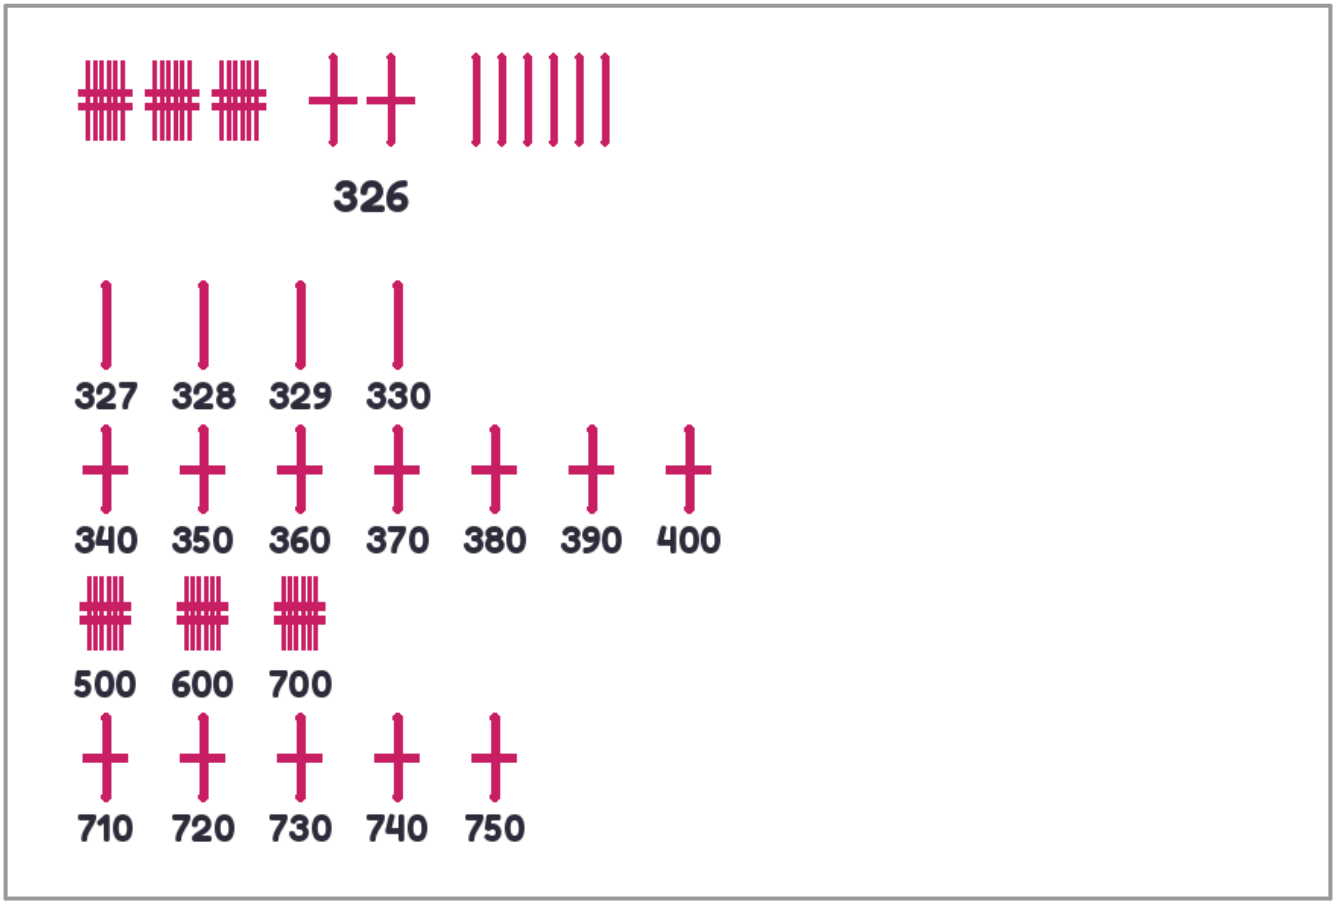

What I did:

The next ten is 40. I draw ones to get to 40.
Next, I draw 6 tens to get to 100.
Last, I draw 1 hundred to get to 200.

We say: 37, 38, 39, 40, 50, 60, 70, 80, 90, 100, 200

Practice Partner, Problem 2

Draw units to count from 326 to 750.

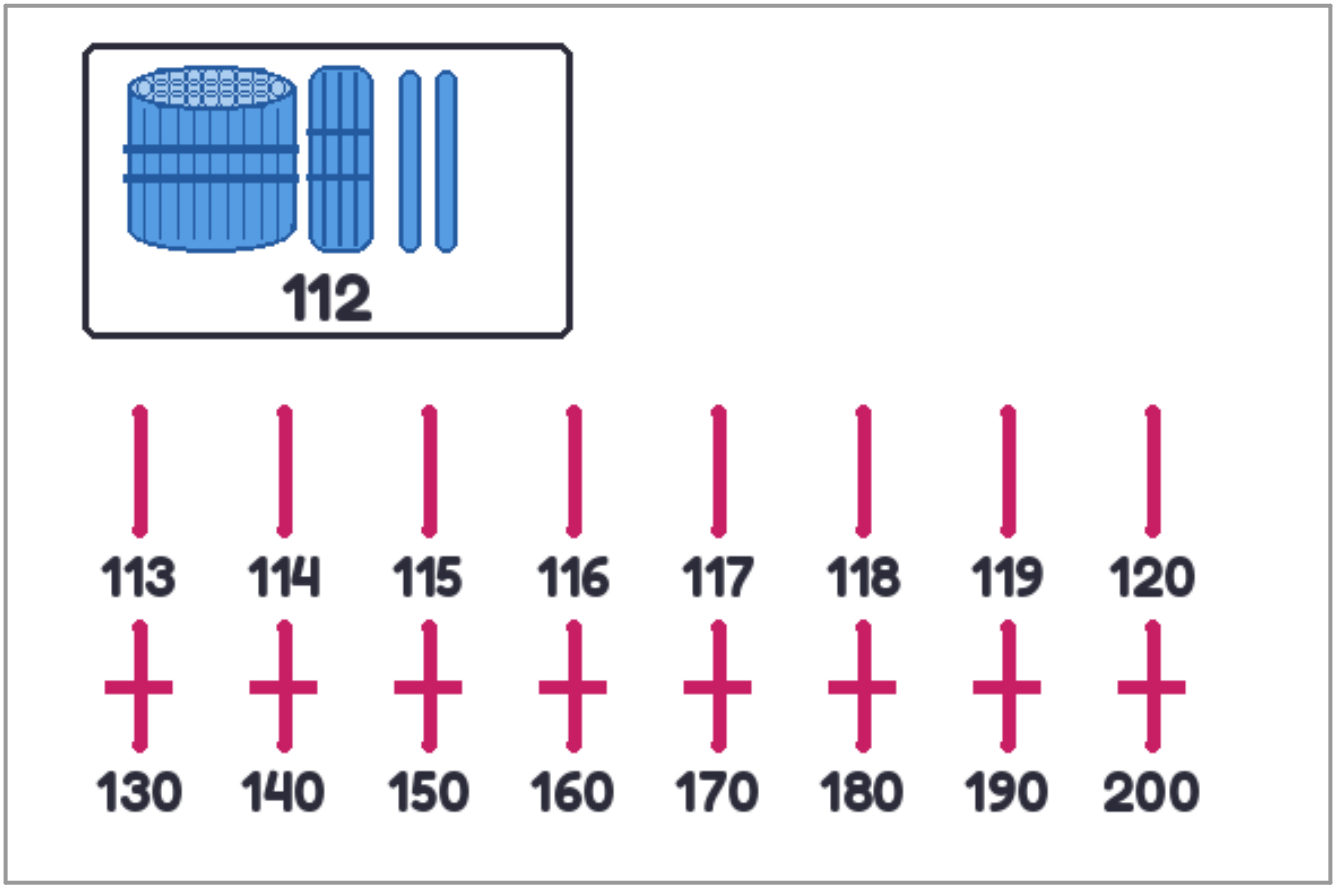

What I did:

First, I draw 326.
Next, I draw 4 ones to get to 330.
Then, I draw 7 tens to get to 400.
Then, I draw 3 hundreds to get to 700.
Last, I draw 5 tens to get to 750.

We say: 326, 327, 328, 329, 330, 340, 350, 360, 370, 380, 390, 400, 500, 600, 700, 710, 720, 730, 740, 750

Practice, Problem 1

Draw units to count from 112 to 200.

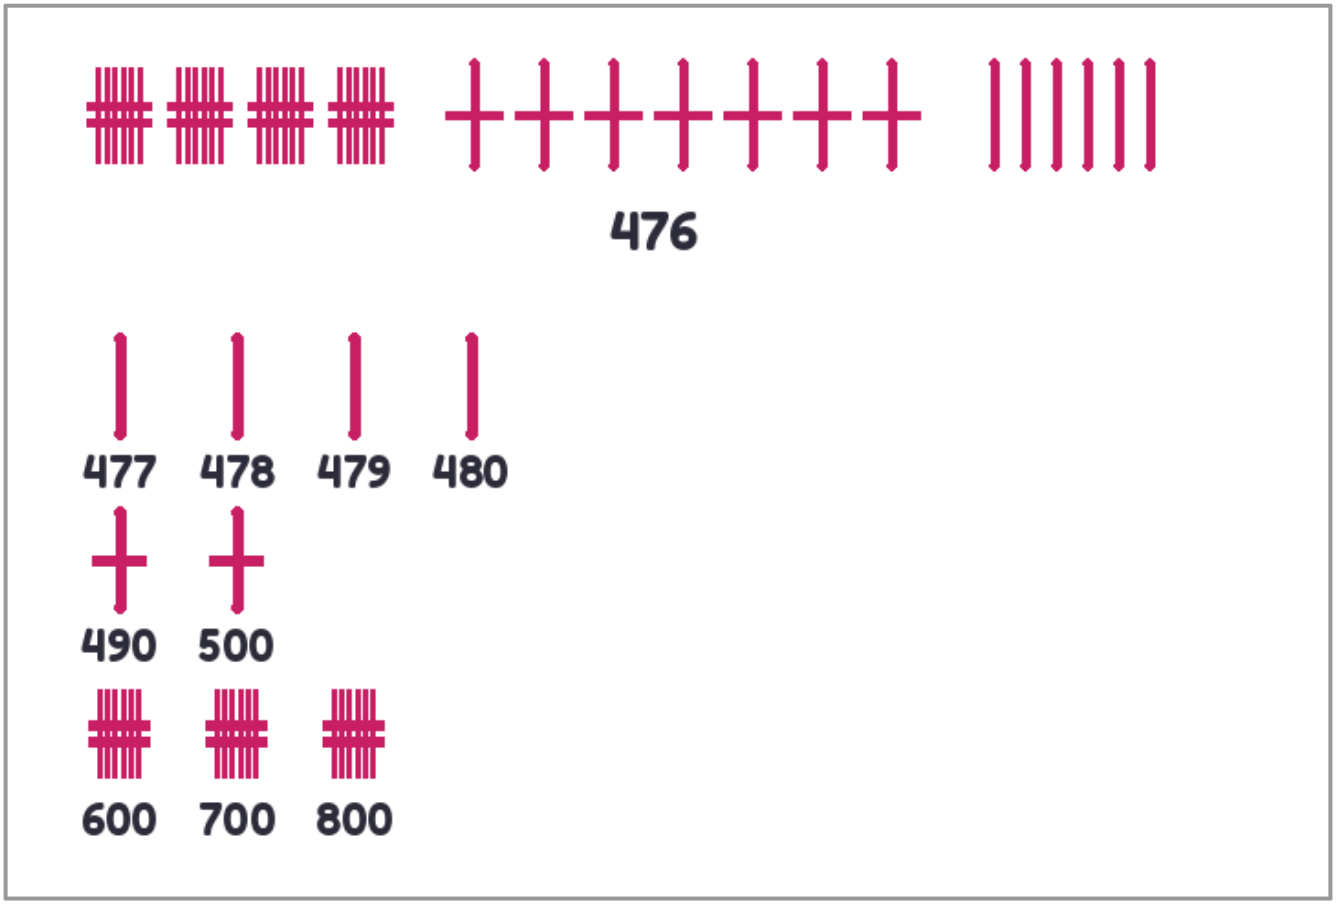

What I did:

The next ten is 120. I draw ones to get to 120.
Last, I draw 8 tens to get to 200.

We say: 112, 113, 114, 115, 116, 117, 118, 119, 120, 130, 140, 150, 160, 170, 180, 190, 200

Practice, Problem 2

Draw units to count from 476 to 800.

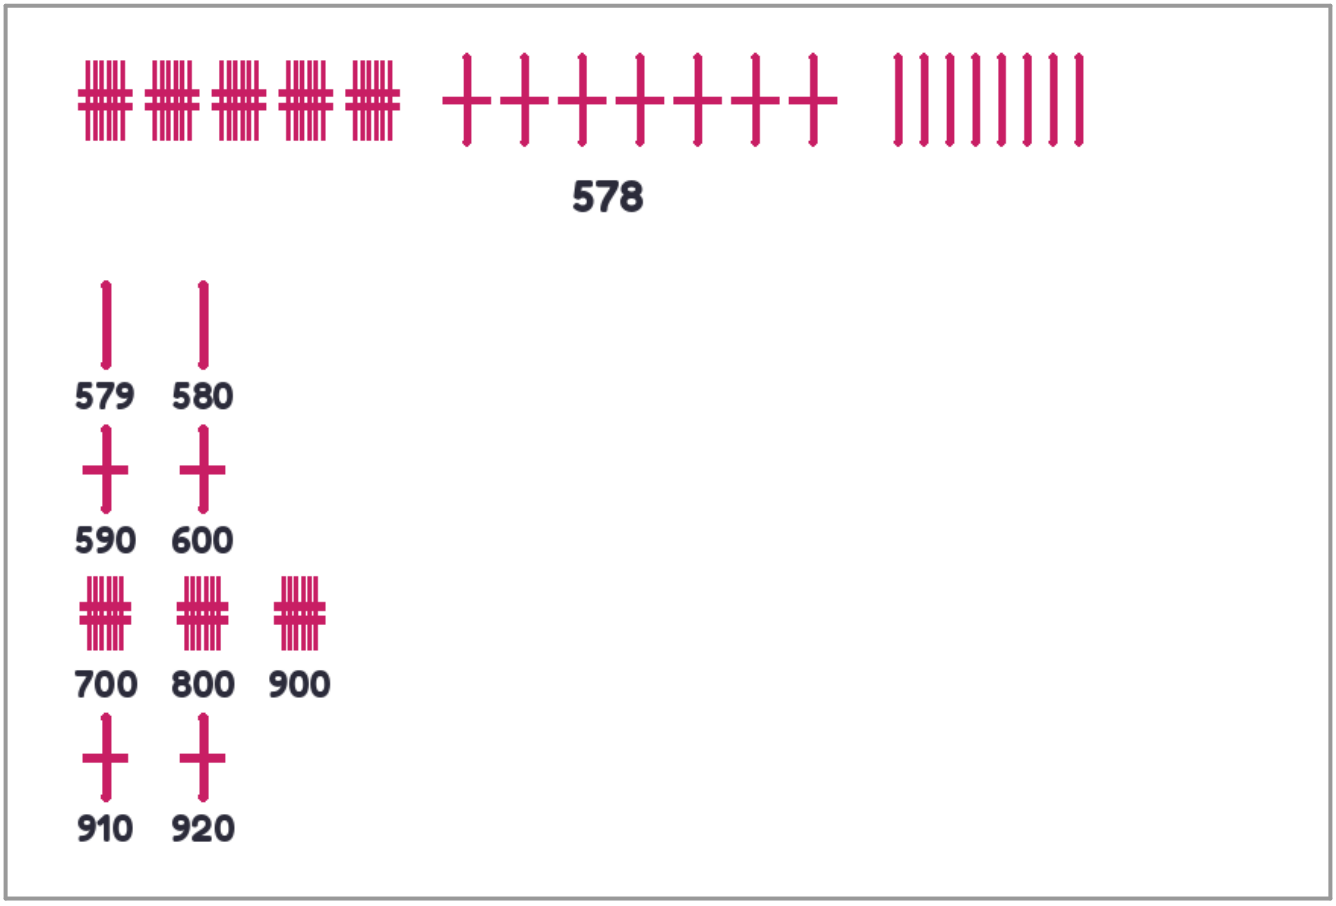

What I did:

First, I draw 476.
Next, I draw 4 ones to get to 480.
Then, I draw 2 tens to get to 500.
Last, I draw 3 hundreds to get to 800.

We say: 476, 477, 478, 479, 480, 490, 500, 600, 700, 800

Lesson 22 Practice, Problem 2

Draw units to count from 578 to 920.

What I did:

First, I draw 578.
Next, I draw 2 ones to get to 580.
Then, I draw 2 tens to get to 600.
Then, I draw 3 hundreds to get to 900.
Last, I draw 2 tens to get to 920.

We say: 578, 579, 580, 590, 600, 700, 800, 900, 910, 920
